Press Release

May 16, 2014

WHO: Central California Society for the Prevention of Cruelty to Animals.

WHAT: Vaccination and Zeuterin Clinic

WHEN: Saturday, May 17, 2014, from 9:00AM to 2:00PM

WHERE: City of San Joaquin – Community Center

WHY: The Central California SPCA is pleased to partner with the city of San Joaquin to offer a low cost vaccination and Zeuterin clinic to residents in the surrounding area and nearby communities.

The Central California SPCA joins the ranks of many clinics across the nation to provide sterilization by the FDA-approved product called Zeuterin. Zeuterin became available recently and could be a "game changer" in efforts to curb the number of homeless animals born each year. Zeutering is the new way to safely and permanently neuter your male dog using a simple injection.

The process is simple. The dog receives a physical exam, a mild sedative, and an injection of Zeuterin (zinc gluconate neutralized by arginine) in each testicle. It receives a small tattoo on its groin to show it has been sterilized, although it remains intact. The dog can resume activities in a short time.

Regular CCSPCA Zeuterin prices are an affordable \$50 for male dogs up to 40 pounds and \$60 for 41 pounds and over.

For more information please contact the CCSPCA at 559.233.7722 ext 107.
